

The new UniTac ULTRA GRIP MAX D. Exclusive to PrecurePro Partners.

*Up to 40% more
snow grip compared
to its predecessor,
when half worn**

PrecurePro

Goodyear Dunlop Precure Retreading Solutions

* Comparative tests made by Goodyear GIC*L on size 315/80R22.5 show that the new Goodyear ULTRA GRIP MAX D offers an improvement in snow grip index of up to 40% when compared to Goodyear ULTRA GRIP WTD. Actual results may vary based on, but not restricted to, road and weather conditions, tyre size, tyre pressure and vehicle maintenance.

MADE TO FEEL GOOD.

Goodyear ULTRA GRIP MAX D

Position

Application

Season

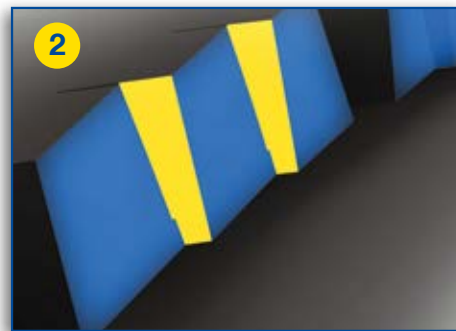

ULTRA GRIP MAX Technology

IntelliMax Block Technology

Longitudinal, diamond shape tread blocks with variable depth and contoured sipes for optimal snow and ice grip.

→ Increases tread stiffness in the footprint, offering regular wear and a high mileage potential.

IntelliMax Edge Technology

Tapered, stepped groove angles on the tread blocks, forming a high number of "biting edges".

→ Optimises tyre to road connectivity, especially on slippery surfaces.

Features

Benefits

IntelliMax Block Technology	Even tyre wear with high mileage potential and low noise emission
IntelliMax Edge Technology	Good winter traction throughout the tyre's life
Raindrop Channels	Improved performance of worn tyre compared to predecessor
M+S marking	Offers mobility in extreme winter conditions
